SUMMARY

MCA candidate at IIIT Bhopal (CGPA 9.55), based in Ajmer, with 3 end-to-end Data Analytics projects spanning **AI-driven analytics**, **e-commerce reporting**, and **customer analytics** — directly relevant to iBirds' AI, e-commerce, and business-analytics service lines. Hands-on with **SQL**, **Power BI**, **Python**, and **Generative AI**, turning raw data into reliable KPIs, dashboards, and business decisions.

EDUCATION

Indian Institute of Information Technology, Bhopal

2024 – 2027

Master of Computer Application (MCA) | CGPA: 9.55

Maharishi Dayanand Saraswati University, Ajmer

2020 – 2023

Bachelor of Science – Mathematics | Percentage: 84.68%

SKILLS

SQL & Data: SQL, PostgreSQL, SQLite, Data Cleaning, Data Validation, Reconciliation, EDA, Customer Segmentation

BI & Reporting: Power BI, DAX, Excel, Google Sheets, Dashboard Development, KPI Analysis, Business Reporting

Python & ML: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

AI & Tools: Gemini, Groq, Streamlit, Plotly, SQLAlchemy, Git, GitHub, VS Code

SELECTED PROJECTS

AI-Powered Data Analyst Copilot

2026

Python, PostgreSQL, Streamlit, Supabase, Gemini, Groq, Plotly, SQLAlchemy | [GitHub](#) | [Live Demo](#)

- Built and deployed a schema-aware AI analytics copilot that converts plain-English questions into validated PostgreSQL queries a 99K-order warehouse, and returns live data, Plotly charts, and grounded business insights.
- Added a business semantic layer, Gemini-to-Groq fallback, 10-second query timeout, 500-row result limit, destructive-SQL blocking, and a dedicated Supabase read-only role; validated core components with 24 automated tests.

E-Commerce Revenue & Operations Analytics

2026

PostgreSQL, SQL, Excel, Power BI, DAX | [GitHub](#)

- Built an end-to-end analytics solution across ~99K orders, transforming 9 raw datasets into staging and star-schema models with 4 dimensions and 4 fact tables.
- Reconciled R\$15.84M in order value, investigated a R\$165K payment gap, and built a 3-page Power BI dashboard tracking R\$13.59M merchandise sales, repeat customers, product/seller performance, and delivery KPIs.

Customer Churn Analysis & Prediction

2026

Python, Pandas, NumPy, SQLite, Scikit-learn, Matplotlib | [GitHub](#)

- Built a 2,000-customer analytics and ML pipeline across customer, subscription, and support tables with cleaning, EDA, feature engineering, and leakage-safe train/validation/test evaluation.
- Improved churn recall from 35% to 61%; threshold tuning raised final recall to ~92%, while segmentation identified Basic + Monthly customers at 58% churn versus 12% for Premium + Two-year customers.

ADDITIONAL EXPERIENCE

Teaching Assistant (TA) – IIIT Bhopal

2025

- Conducted programming lab sessions and mentored junior MCA students in structured problem solving, debugging, and project development.

ACHIEVEMENTS

- Smart India Hackathon 2024** – Team Leader, TechSprinters: built an alumni networking and mentorship platform for the team's SIH submission.
- Smart India Hackathon 2025** – Runtime Rebels: built DiagniMate, a multilingual AI healthcare chatbot, for the team's SIH submission.
- NIMCET:** All India Rank (AIR) 631.
